The five core principles of lean are:

1. **Value:** Define value from the customer's perspective.
2. **Value stream:** Identify and eliminate waste in the value stream.
3. **Flow:** Create a continuous flow of value.
4. **Pull:** Only produce what the customer needs, when they need it.
5. **Perfection:** Continuously improve the process.

Lean principles can be applied to all aspects of healthcare, from patient care to administrative processes. Some examples of how lean has been used to improve healthcare include:

- **Reducing wait times for appointments and procedures**
- **Improving the quality of care**
- **Reducing costs**
- **Increasing patient satisfaction**

The Lean Healthcare Handbook is a comprehensive guide to implementing lean in healthcare organizations. It provides a step-by-step approach, with real-world examples and case studies.
